EMPLOYMENT HISTORY

Foresight Regulatory Strategies in Wilmington, MA

October 2016 – Present

Data Analyst

- Analyzed data provided by clinical trial subjects in order to find meaningful trends using Microsoft Excel, PowerPivot, PowerQuery, and FileMaker.
- Organized the data in order to amend it to clinical trial reports and present it to clients in a clear and meaningful way.
- Adhered to the strict standards of the FDA when handling clinical data and designing software solutions.

Software Development

- Created an inventory solution using FileMaker from scratch in order to monitor the movement and statuses of clinical materials into and out of Foresight Inventory and various clinical trial sites.
- Created a user interface using VBA to immediately generate clinical reports.
